

## 14-Pin DFB Laser for External Modulation

### Features

- ITU grid wavelengths 50 or 100 GHz Spacing
- Low RIN
- PM or SM Fiber
- Laser welded and hermetically sealed
- Built in thermistor, TEC, and monitor detector
- Optional Bias-T
- Telcordia GR-468 Core / MIL-Std 883 compliant

### Applications

- Long haul WDM transmission
- RF Links
- Seeding
- Pulsing
- Sensing
- CATV

### General Description

The EM4 high power distributed feedback laser (DFB) is a CW InGaAsP/InP multi-quantum well (MQW) laser diode. The module is ideal in applications where low RIN and stable PM properties are needed. The module contains a cooler, thermistor and monitor detector and is designed and built using EM4s high reliability platform for defense components.

### Absolute Maximum Ratings

Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only and operation of the device at these or conditions beyond these is not implied. Exposure to absolute maximum ratings for extended periods of time may affect device reliability.

| Parameter                   | Sym.      | Condition | Min | Max | Unit |
|-----------------------------|-----------|-----------|-----|-----|------|
| Storage Temperature         | $T_{STG}$ |           | -40 | +85 | °C   |
| Operating Case Temperature  | $T_{OP}$  |           | -20 | +65 | °C   |
| Laser Forward Current       | $I_F$     |           |     | 500 | mA   |
| Laser Reverse Voltage       | $V_R$     |           |     | 2   | V    |
| Photo Diode Photo Current   | $I_{PD}$  |           |     | 10  | mA   |
| Photo Diode Reverse Voltage | $V_{PD}$  |           |     | 20  | V    |
| TEC Current                 | $I_{TEC}$ |           |     | 2.2 | A    |
| TEC Voltage                 | $V_{TEC}$ |           |     | 6   | V    |
| Thermistor Current          |           |           |     | 2   | mA   |
| Thermistor Voltage          |           |           |     | 5   | V    |
| Lead Soldering Time         |           |           |     | 10  | s    |
| Lead Soldering Temperature  |           |           |     | 250 | °C   |
| ESD                         |           | HBM       |     | 500 | V    |

## 14-Pin DFB Laser for External Modulation

### Optical Characteristics

$T_{OP}=25^{\circ}\text{C}$ , continuous wave and beginning of life unless otherwise specified.

| Parameter                     | Sym.          | Condition               | Min                      | Typ | Max                 | Unit                    |
|-------------------------------|---------------|-------------------------|--------------------------|-----|---------------------|-------------------------|
| Operating Chip Temperature    | $T_{CHIP}$    |                         | 20                       |     | 35                  | $^{\circ}\text{C}$      |

<sup>1</sup>  $I_{OP}$  and  $T_{OP}$  defined on device specific test sheet supplied with each unit.

## 14-Pin DFB Laser for External Modulation

### Fiber Specification Single-mode Polarization Maintaining

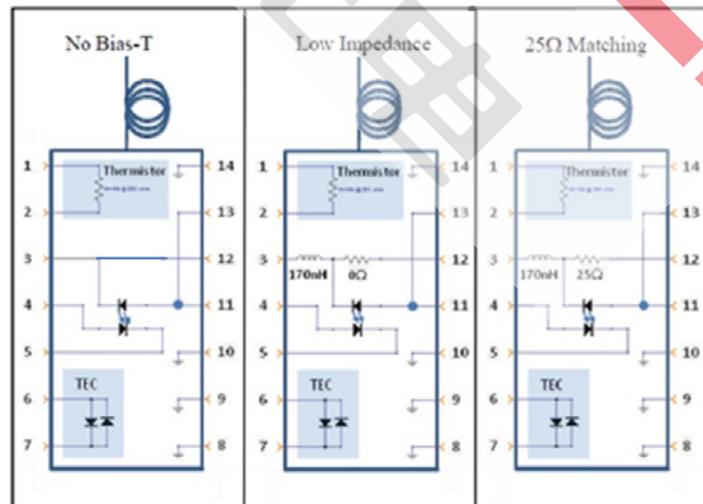

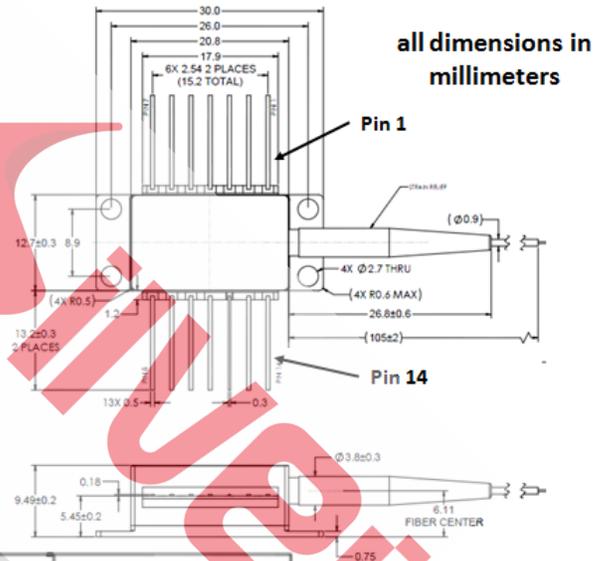

| Parameter   | Typ.     | Unit |
|---|----------|------|
| Fiber Type  | PM       | -    |
| Core Diameter   | 8        | μm   |
| Outer Diameter  | 125      | μm   |
| Buffer Material 250um                                     | Acrylate |      |
| Loose Buffer Material 900um (full-length buffer optional) | PVDF     |      |
| Minimum Pigtail Length                                    | 1        | m    |
| Minimum Bend Radius                                       | 35       | mm   |
| Proof Strength  | 200      | KPSI |

### Fiber Specification Single-mode Non-Polarization Maintaining

| Parameter                              | Typ.     | Unit |
|--|----------|------|
| Fiber Type                             | SM       | -    |
| Core Diameter                          | 8        | μm   |
| Outer Diameter                         | 125      | μm   |
| Buffer Material 250um                  | Acrylate |      |
| Tight Buffer Material 900um (optional) | Hytrek   |      |
| Minimum Pigtail Length                 | 1        | m    |
| Minimum Bend Radius                    | 35       | mm   |
| Proof Strength                         | 100      | KPSI |

### Pinout and Mechanical Drawing

| Pin | Description          | Pin | Description                     |
|-----|----------------------|-----|---------------------------------|
| 1   | Thermistor           | 14  | Case                            |
| 2   | Thermistor           | 13  | Laser Anode                     |
| 3   | Laser Cathode (Bias) | 12  | Laser Cathode (optional bias t) |
| 4   | Monitor PD Anode     | 11  | Laser Anode                     |
| 5   | Monitor PD Cathode   | 10  | Case                            |
| 6   | TEC+                 | 9   | Case                            |
| 7   | TEC-                 | 8   | Case                            |

| Product Family     | AA1416  | 40mW DFB Laser for External Modulation   |        |      |    |                |          |                              |

\*FC/UPC connector available only as PM250 with an overall fiber length of 2 m +100/-0mm

\*\*LCA connector only offered with SM900 fiber. Fiber length 530 +/- 20mm as measured from outside wall of package (snout end) to tip of ferrule on LCA connector.

\*\*\*Optional full-length 900 µm loose-tube PVDF buffer recommended for laboratory use. Adds approximately one week to device lead time. All devices supplied with approximately 9 cm of loose buffer as strain relief.

The component complies with all applicable portions of 21 CFR 1040.10, 21 CFR 1010.2 and 21 CFR 1010.3. Since this is a component, it does not comply with all of the requirements contained in 21 CFR 1040.10 and 21 CFR 1040.11 for complete laser products.
