### General Description

The EM4 high-power 1064 nm 14-pin distributed feedback laser (DFB) is ideal for applications requiring a single-mode fiber-coupled 1064 nm device. These packaged laser diodes can be pulsed electrically and incorporate a built-in thermoelectric cooler with thermistor, back facet monitor detector, and an optional bias tee with a choice of matching impedances. Standard fibers can be supplied with optional protective furcation tubing and terminated with a variety of connectors.

### Absolute Maximum Ratings

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only and operation of the device at these or conditions beyond these is not implied. Exposure to absolute maximum ratings for extended periods of time may affect device reliability.
